The proposed "remedy" will do nothing to improve the situation. If the DOJ prosecuted accused terrorists like the are prosecuting Microsoft, they'd create a solid and unassailable case proving that the accused are guilty, then recommend that they be let go, as long as they promise to only blow up half as many buildings. MS is a monopoly. Treat it like one and protect the citizens of the United States from their illegal and anti-competitive practices. Or, to phrase it differently, do your job instead of being a Microsoft patsy.
